

# Wildlife in Peril

WildCare is coming to teach about going green. Below are some ways you can be green!

Circle the best choice for each scenario, and then write down the reason why you chose that answer.

1. Aron noticed an empty bag of potato chips on the ground at school, should they...

pick it up and throw it in the garbage or leave it on the ground ?

Why? \_\_\_\_\_

2. Taylor always gets thirsty at school, should they...

bring a reusable bottle or buy a plastic water bottle ?

Why? \_\_\_\_\_

3. Karter doesn't always finish their lunch, should they...

throw their food in the garbage or place their leftover food in the compost ?

Why? \_\_\_\_\_

4. Finley is going to the farmers market, should they...

bring their own reusable cloth bag or use a disposable plastic bag at the market ?

Why? \_\_\_\_\_

## **Come up with a solution that you haven't heard of before for the following problem:**

Humans use trees for many things, such as building houses and making paper. Sometimes humans cut down trees to clear land in order to raise livestock such as cows. When businesses cut down most of the forest's trees it is called deforestation. Deforestation causes habitat loss for many wild animals around the world, and causes soil erosion that can lead to mud slides.
