

# A Nature Hike

On your hike with WildCare's Terwilliger Nature Guides, you explored the trail in a special wildlife preserve. Your guide may have pointed out a variety of plants, animals, or even bugs to show you in their natural habitat. This activity will help us compare what all the small groups saw on their hikes.

**Use this space to write down all that your hike group remembers seeing on the trail.**

Fill in the chart below by counting up all the animals, plants, insects, and any other things you saw and coloring in one square for each thing in that group. (For example, if you saw 5 animals, color in 5 of the squares above the word "ANIMAL.")

## MY NATURE HIKE CHART

<b>ANIMAL</b>	<b>PLANT</b>	<b>INSECT</b>	<b>OTHER</b>

Use this chart to answer the questions on the back of this page.

## MY NATURE HIKE CHART

Use your finished chart to help answer these questions about your hike.

1. Which of the four groups (Animal, Plant, Insect, Other) did you see the most?

\_\_\_\_\_

2. Which of the four groups (Animal, Plant, Insect, Other) did you see the least?

\_\_\_\_\_

3. Did you see more plants or animals on this hike? \_\_\_\_\_

Why do you think that is? \_\_\_\_\_

4. If you returned to this same habitat in a different season (spring, summer, fall, winter), how do you think your chart would look? \_\_\_\_\_

\_\_\_\_\_

Now meet with another hike group to compare your charts.

1. What did the other group see the most? \_\_\_\_\_

2. What did the other group see the least? \_\_\_\_\_

3. Why might your chart look different than any of the other hike small groups?

\_\_\_\_\_

\_\_\_\_\_
