

Bobcat

The **Bobcat** is a wild cat that lives in California. Bobcats have short tails, strong claws, and sharp teeth. They are important predators that like to eat rodents.
Can you color the bobcat to help him hide when he is hunting?

Striped Skunk

The **Striped Skunk** sprays a stinky odor to protect itself. It lets predators know it's going to spray by hissing, stomping its feet, and finally raising its fluffy tail! Color in this skunk in its forest habitat!

Raccoon

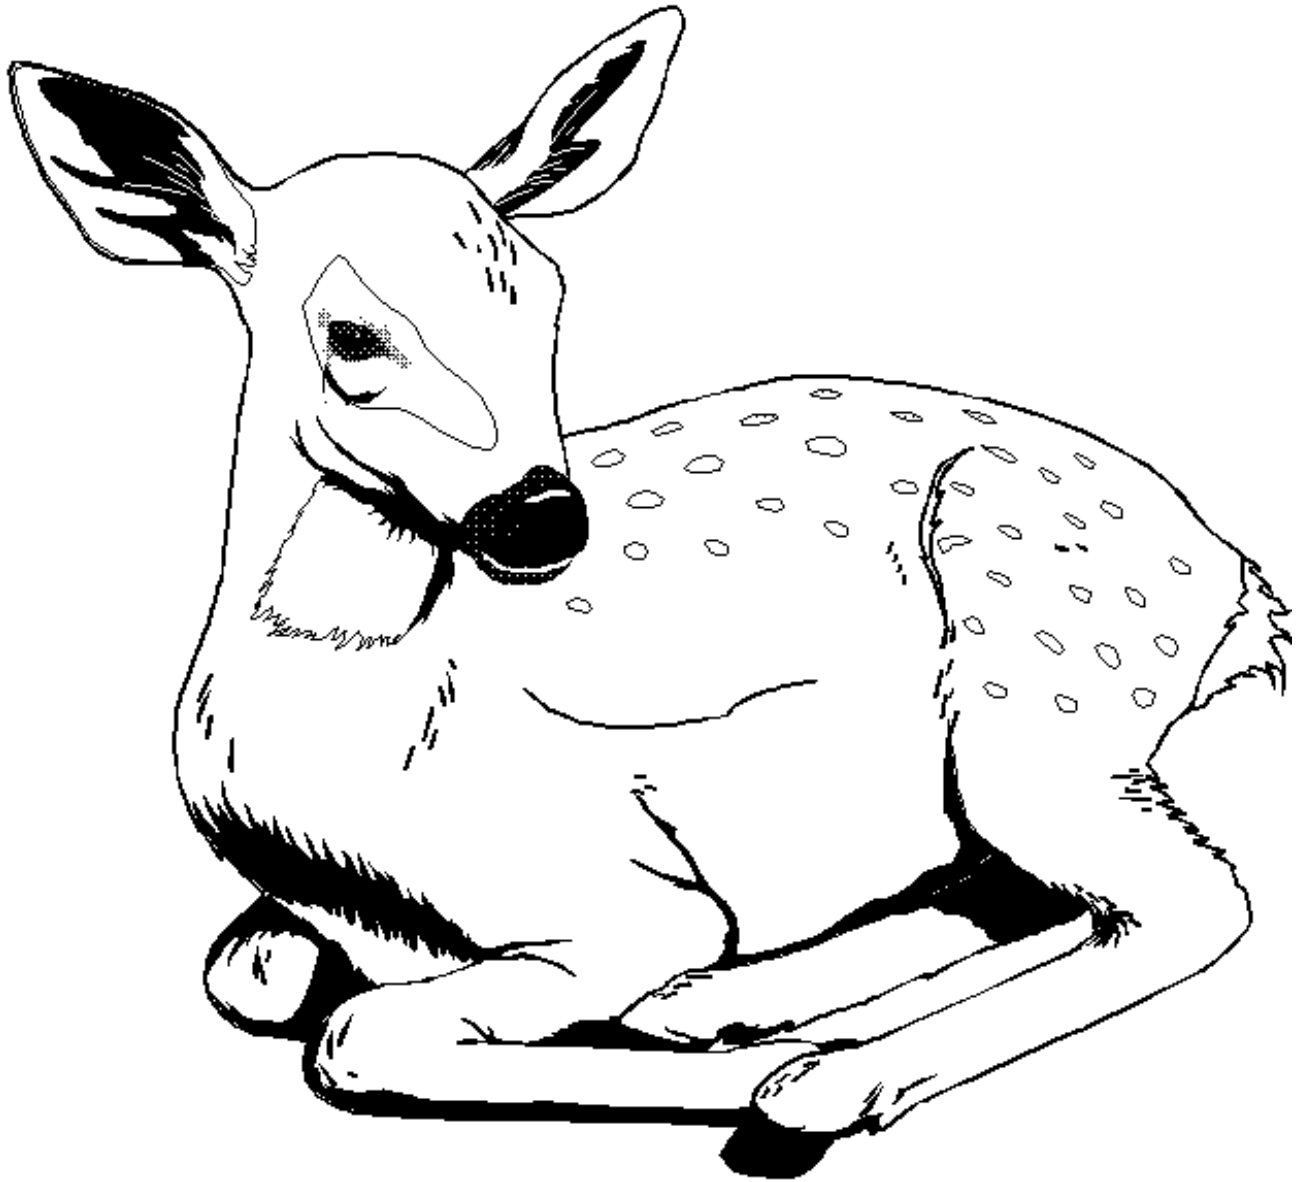

Raccoons are amazing swimmers and climbers. They can even climb down a tree head first! They are omnivores so they eat both plants and meat. One of their favorite foods from the forest are the crayfish that live in the streams!

Black-tailed Mule Deer

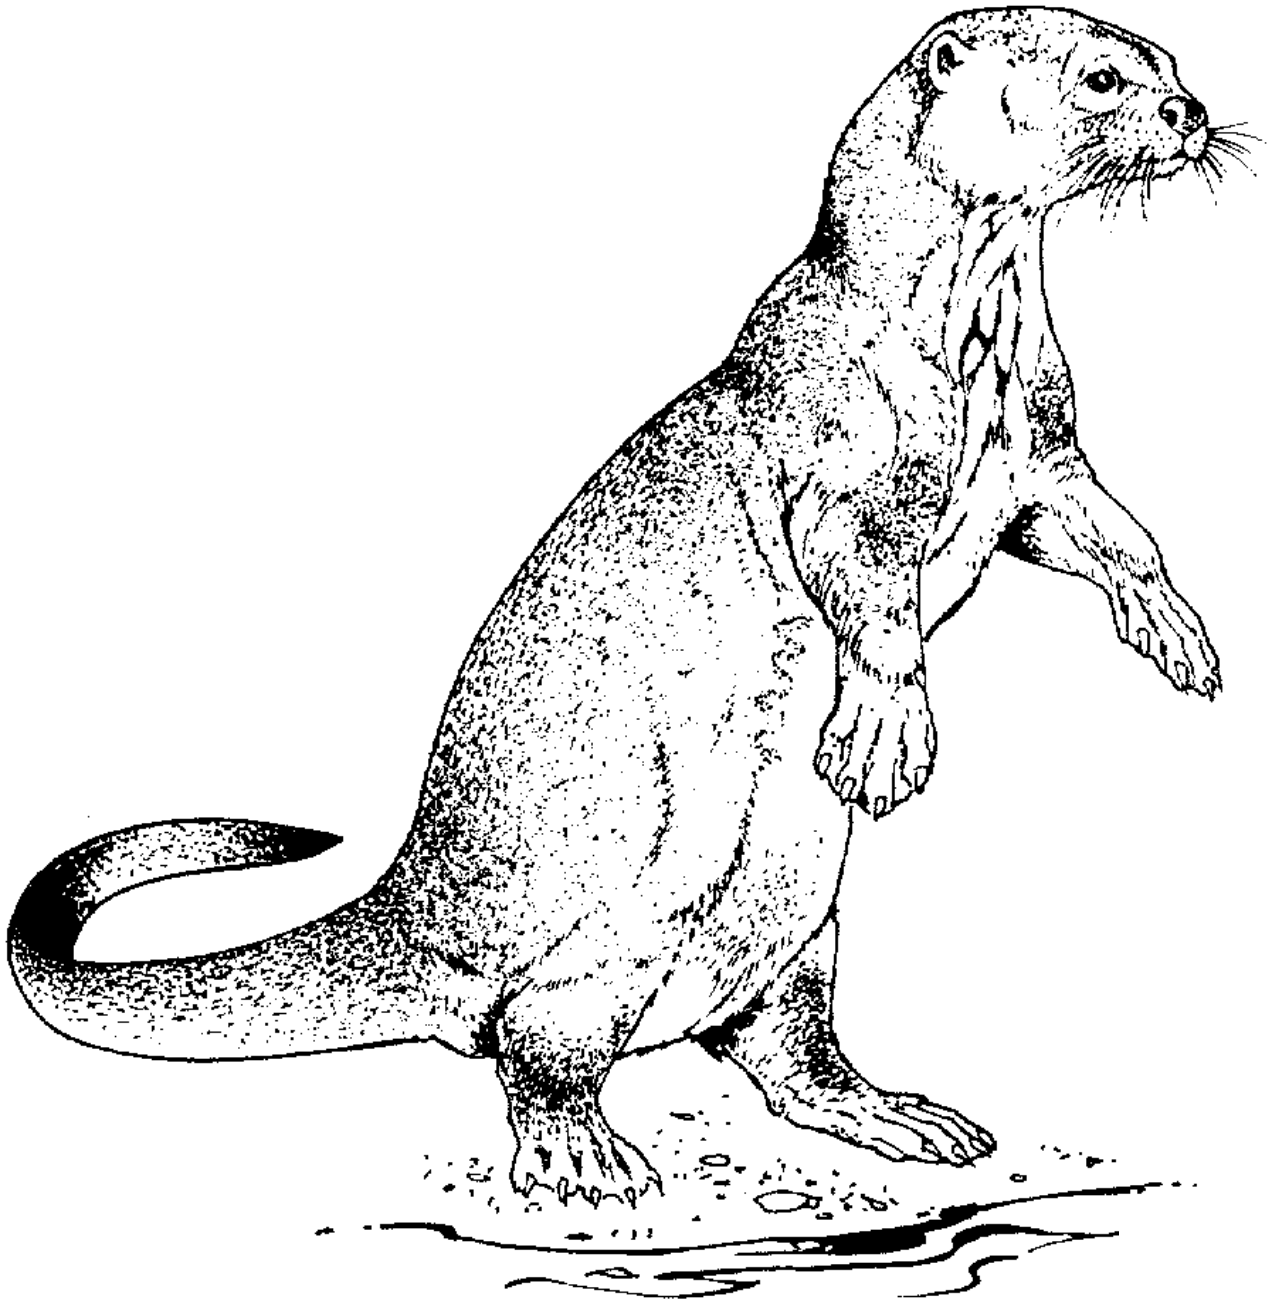

Black-tailed Mule Deer are brown with black on their tails.
Baby deer are called fawns. Fawns have white spots on their fur that helps them
hide on the forest floor.

Sea Otter

Sea Otters have the thickest fur out of any mammal in North America.

The fur helps keep them warm as they swim in the cold ocean water.

Sea Otters are very important for the Kelp Forest to stay healthy.

Draw a Sea Otter swimming under the kelp!

Chipmunk

The Sonoma Chipmunk lives on the forest floor.

They like to eat fungi and redwood seeds.

They will stuff their cheek pouches full of food to carry it all back to their home for later!
