

Ocean Adventures

There are many different habitats found in and around the ocean. A habitat is where an animal lives in the wild. A habitat has a place for the animal to rest, to find food, and to hang out with its friends! Animals may travel to different habitats to visit or live at different times of their lives.

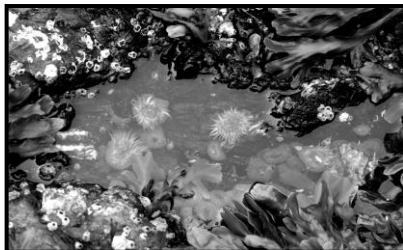

Draw a line from the ocean habitat to the sea life you might find there.

OPEN OCEAN

SANDY BEACH

TIDE POOL

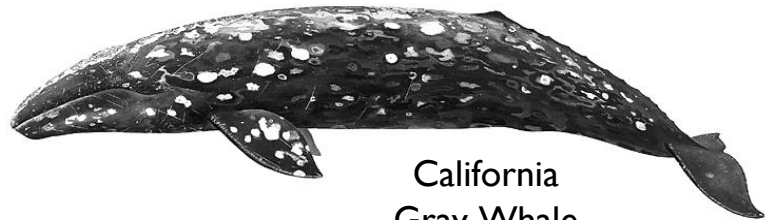

KELP FOREST

ESTUARY

Sea Star

California
Gray Whale

Sea Otter

Sandpiper

Pelican
