

Wildlife Ambassadors

Whoooo's Coming to Visit?

WildCare is a special hospital that takes care of many types of wild animals.

Some of the wild animals will only eat plants- these are called **herbivores!**

Some of the animals only hunt for meat- the **carnivores!**

And others will eat both plants and meat- the **omnivores!**

When WildCare comes to visit your classroom,
you might get to meet one of each type of animal!

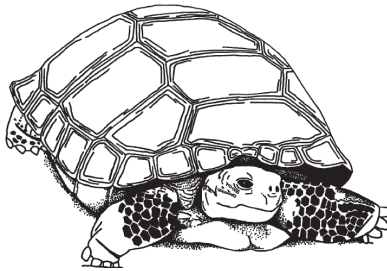

Color the animals that eat plants GREEN.

Color the animals that eat meat RED.

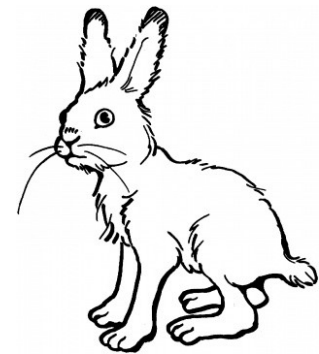

Color the animals that might eat both BLUE.

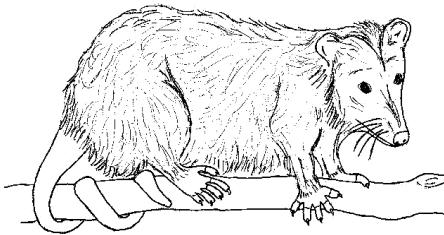

Owl

Tortoise

Hare

Opossum

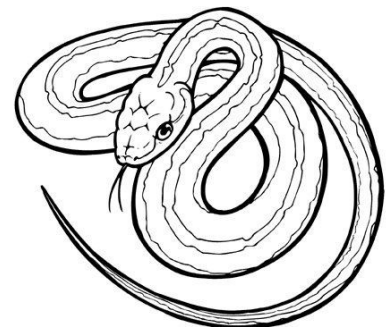

Raccoon

Bobcat

Squirrel

Snake

Wildlife Ambassadors

Whoooo's Coming to Visit?

WildCare is a hospital that takes care of sick or hurt wild animals!
When we take care of the animals we have to make them lots of healthy meals.

Some of the foods they like to eat are plants, like grasses, berries, or seeds.

Some animals like to eat meat, like mice or eggs.

We try to give them all their favorite foods so they can get all better
and back to their homes in the wild!

**These are some of the foods the animals in our hospital like to eat.
Draw a circle around the things you like to eat too!**

Avocado

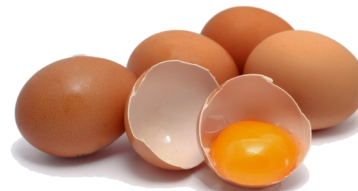

Lettuce

Sunflower Seeds

Crickets

Eggs

Blackberries

Rodents

Mealworms
