

A Nature Hike

On your hike with WildCare's Terwilliger Nature Guides, you visited a special **habitat** for wildlife. A habitat is a place where animals live in the wild, where they find their food, and where they spend times with their friends. Imagine if you were staying in the wild at the habitat you visited. Try to think of all the things you saw on your hike that might help you survive!

Draw the things that you would eat:

Draw how would you stay warm:

Draw how you would get fresh water to drink:

Draw a spot where you could safely rest:
