Wild Wetlands

WildCare came and taught about the wetlands. Use the knowledge you learned to decide if the statements below are true or false.

- True** or **False** Wetlands are a safe place for many animals to raise their young.
- True** or **False** The salt marsh wetlands today are larger and cover more area than the salt marsh wetlands of 100 years ago.
The bay area has lost about 90% of its historical tidal wetlands.
- True** or **False** All wetlands are freshwater habitats.
The tidal wetlands in the Bay Area are salt water wetlands.
- True** or **False** When it rains, wetlands increase flooding since they are already filled with water.
Wetlands act like a sponge soaking up flooding waters, helping to prevent minor floods and lowering the water levels on bigger floods.
- True** or **False** The Salt Marsh Harvest Mouse is endangered mainly because of habitat loss.
- True** or **False** The Salt Marsh Harvest Mouse lives in habitats all over the world. **They only live in the salt marsh habitat in the Bay Area and in the Delta.**
- True** or **False** Ducks and geese avoid wetlands during their migrations.
Wetlands are a common resting stop for migrating birds; they offer safe spaces and plenty of food for visiting wildlife.
- True** or **False** Leopard shark babies use the salt marsh wetlands in the Bay Area as a safe place to grow and find food.
- True** or **False** River otters aren't sensitive to pollution and can be found in many polluted wetlands.
